

Carolina Video Security, Inc.

The security of any facility is significantly enhanced by automatically locking all doors and gates and by increasing the identification and authentication of individuals who access your facility.

Access control solutions are scalable from a single door to hundreds of doors. The identification process can begin with proximity cards and key fobs and increase in sophistication to include unique biometric characteristics.

The fundamental principles in identification and authentication are based on these three tiers:

- 1) Something you have (like a key card);
- 2) Something you know (like a PIN number);
- 3) Something you are (like a finger print).

CVSI is a certified channel partner for leading access control product providers such as Brivo. Our solutions utilizes high grade commercial locks and door hardware, networked devices and intelligent control panels to authenticate, monitor and record access into your facility.

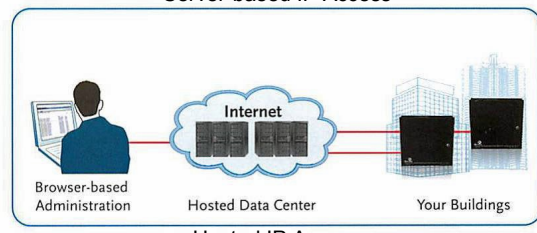

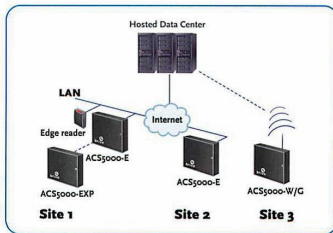

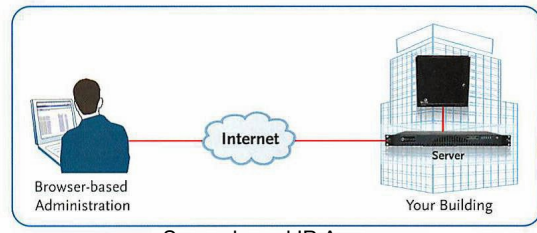

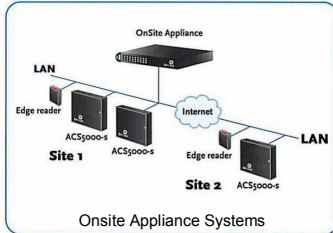

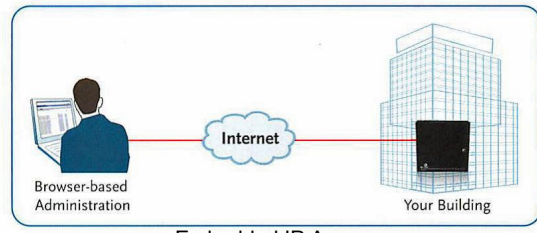

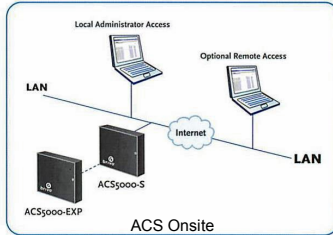

Access control solutions are an affordable option for small businesses and an essential tool for large businesses. CVSI has experience with a wide range of access control needs and offers solutions scalable in both size and sophistication.

- **Enhance Facility Security**
- **Execute Emergency Lockdowns**
- **Auto Un-lock Public Doors**
- **Identify and Authenticate All Workers and Visitors**
- **Increase Control with Roles and Permissions**
- **Know More with Audit Trails**
- **More Economical with New Generation of IP-based PoE Door Controllers**
- **Secure Hosted and On-Premise Management Options**
- **Improve Awareness with Automatic Notifications**
- **Control Vehicle Access Through Automated Gates**

“Access Control Systems are the most effective way for any organization to enhance their security. These systems efficiently identify and authenticate travel in and out of a facility while providing additional means for protection in an emergency situation.”

ACCESS CONTROL SYSTEMS
